EDUCATION

KIT-Kalaignarkarunanidhi Institute of Technology, Coimbatore.

2024 – 2028

B.E. CSE (AI & ML), III - year

CGPA: 8.40/10.0

Coursework: Computer Architecture, Computer Networks, Artificial Intelligence and Foundations, DSA, OOP

EXPERIENCE

AI & Machine Learning Intern, Femtosoft Technologies – Chennai, India (Onsite)

May 2026

- Developed a Delivery Delay Prediction System using machine learning techniques.
- Built predictive models and improved performance through data preprocessing and feature engineering.
- Created user-friendly web interfaces for AI-powered applications.
- Worked with Pandas, NumPy, Scikit-learn, and Streamlit for end-to-end project development.

PROJECTS

Movie Booking System | React.js, Node.js, MongoDB, JWT, Git

Jan 2026 | [Repo](#)

- Developed a full-stack Movie Booking System allowing users to browse movies, view show timings, select seats, and book tickets.
- Implemented secure user authentication, real-time seat availability tracking, and booking confirmation functionality.
- Designed an **admin** dashboard to manage movies, theatres, show schedules, and monitor bookings efficiently.

Deepfake Detection System | Python, CustomTkinter (GUI), CNN (Xception + ResNet)

Aug 2025 | [Repo](#)

- Developed a deepfake detection model using combined CNN architectures (**Xception + ResNet**) for high-accuracy classification.
- Implemented preprocessing and training pipelines to detect synthetic images displayed through a **GUI** built with CustomTkinter.
- Increased **accuracy** through optimized dataset selection and model tuning.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, JavaScript

AI/ML: Scikit-learn, NumPy, Pandas, OpenCV, TensorFlow

Web Development: HTML, CSS, React.js

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code, Power BI

CERTIFICATIONS & COURSES

Maiyyam - Full Stack Development Traineeship

Coursera - Get Started with Python

Coursera - How Google Does Machine Learning

Salesforce Trailhead - Agentblazer Champion

NPTEL - Algorithmic Graph Theory & DS

NPTEL - Database Management Systems

COMPETITIVE PROGRAMMING

Leetcode : Max rating – **1408** | Solved problems: **200+** | Badges: **2** | Streak: **100+** days.

[Link](#)

Codeforces : Max rating – **815** | Position: Newbie.

[Link](#)

Codechef : Max rating – **1147** | Position: **1 Star (Div4)** | Problems: **500** | Badges: **5** | Streak: **200+** days.

[Link](#)

Codeio : Solved problems: **674** | Active Days: **229** | C Score: **647.58**

[Link](#)

ACHIEVEMENTS

- Participated in **multiple hackathons**, building working prototypes under real problem statements.
- Solved **500+** problems on CodeChef and **200+** on LeetCode, improving algorithmic and logical thinking skills.
- **Young Leaders Global Immersion Program — UAE (Jan–Feb 2026)** Attended AI & ML masterclasses at Zayed University (Abu Dhabi & Dubai); competed in AIESEC Industry 4.0 Hackathon at De Montfort University; earned certificates from Zayed University, Odoo, and AIESEC.
